SUPPLEMENT TO  
REPORT 

THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. The Prvi Partizan Arms and Ammunition Factory is located on the eastern edge of the town of Titovo Uzice, in the area known as Krcagovo, on the site of a factory which, before World War II, manufactured hunting rifles. The factory is engaged in light infantry weapon repairs, production of Soviet-type Vintovka rifles, parts for Soviet and German-type submachine guns, and infantry ammunition.
2. Daily production of ammunition is reported to be 25,000 rounds; however, estimates have been received that production amounts to 60,000 and even 100,000 rounds.
3. Approximately 1,400 workers are employed. The director of the factory is Colonel Ilija Momcilovic and the chief engineer is Vjekoslav Primorsek. The equipment used is of German, Czechoslovak and Soviet make. Electric power is furnished by the thermal power plant in Uzice. It is planned to expand the factory and double the production upon completion of the hydro-electric plant on the Ovearsko-Kablarska Klisura (cliff), which is now being constructed.
